

7 Aug 45

Hello There —

Is it warm enough for you this evening in Logan - The weather is Plumb warm in this section but for the last few days I mean since last night it has been a little cloudy like it might be cooling us up a rain. The weather has been hot enough or hotter than average so its quite possible that we might have a little sky juice. Maybe Thursday & Friday night of this week because that is the day that we are scheduled to be out in the field. Or spend those nights in the pen.

No matter when it decides to rain let it come - it will do

my old soul good.

Did I get a letter this day?
No - but there came an era with
no name on it so I laid it on my
bunk - so far I have had a few spare
minutes to read it when the other
fellows have it been doing the job
or using it - But the more that
reads it the better it will be.

This day has been what they
call a dry run. By now you
have heard me speak of dry run
because that is what 90% of our
deal is. Lots of dry run, and
only a few minutes of actual
experience on the firing line.

This day they have been
speaking lots on this new High
explosive Bomb - but no matter
how much bombing they do
the Infantry will have to move

in and take possession unless the enemy gives or accepts the unconditional surrender.

Well if they surrender it will be so much the better for the United States because it will cost lots to take over the home land of the Japs.

The News just stated that there have been some 60 cities burned or destroyed -

Well one day this war will all be over and millions of boys will be able to return to their homes Home - A real word. The backbone of The Nation or world -

May the Lord hasten the day when we'll be able to be together.

Again -

This day I am on my bunk and writing on my knee - There is a radio blating out & 15 fellows doing 15 different activities of all sorts.

I have lots of cleaning to do this evening so I'll sign off for now with lots of love to you and the boy -

Remember to smile & get plenty of rest -

Your Husband
Tedand -
