

1 March 1946

Cheerups Dearest Wife & Son,

If your letters have been coming in of late like mine have this is the first letter you have received in 7 or 8 weeks and now you have received all of 7 or 8 - I have great intention of writing every day but just as a letter gets started the time for school or time to take the show come back or see other odd jobs come up so this fellow gets to the job that is waiting the moment and before I know it a week has rolled by.

But all kidding aside now I'm on with the letter. This dear outbreak is just about the same as the Peace time in my own in the states. A lot of spirit & Polish and give the world other things that goes with it. You have to do this just so because some idea comes floating out of them and lots of time it is Olin's Remarks - but the most of happiness lies in doing what you like but in listening to the what you have to do. And we have to go without mail since 18th January or about so.

Oh well - It is just one of those things in this old world happens - If I would be one to worry I would have gone just to the office but when I have a spare minute I read or write or do something that is the way of my going from day to day.

I heard over the radio that country where Senator Thomas from Utah proposed to discharge men at the regular system or plan - and release men with them at the rate of service so from the looks of things we won't be able to

each other much before next xmas or thanksgiving. A rough deal but time seems to roll by pretty fast.

There is it much for to write about it seems only thing my sweetheart & Love you -
Glove the boys. Father the boys in you love &
give them a big hug for me -

Remember I Love You -

William
